"X-ray structure of the Asn276Asp variant of the Escherichia coling TEM-1 beta-lactamase: direct observation of electrostatic modulation in resistance to inactivation by clavulanic acid.";

El Biochemistry 38:9570-9576(1999).

C -!- FUNCTION: TEM-type are the most prevalent beta-lactamases in including they hydrolyze the beta-lactam bond in susceptible beta-lactam antibiotics, thus conferring resistance to penicillins include and cephalosporins. TEM-3 and TEM-4 are capable of hydrolyzing cefotaxime and ceftazidime. TEM-5 is capable of hydrolyzing ceftazidime. TEM-8/CAZ-2, TEM-16/CAZ-7 and TEM-24/CAZ-6 are markedly aztreonam. TEM-8/CAZ-2, TEM-16/CAZ-7 and TEM-24/CAZ-6 are markedly active against ceftazidime. IRT-4 shows resistance to beta-including ceftazidime. CaTALYTIC ACTIVITY: A beta-lactam + H(2)0 = a substituted beta-

MISCELLANEOUS: The beta-lactamase present on pBR322 was clfrom plasmid R1 (R7268).
SIMILARITY: Belongs to the class-A beta-lactamase family.
                                                                                                                                                                                                                                                                                                                                                                                                                                           ween the Swiss Institute of Bioinf

"Structure of the SHV-1 beta-lactamase.";

Biochemistry 38:5720-5727(1999).

-!- CATALYTIC ACTIVITY: A beta-lactam + H(
amino acid.

-!- SIMILARITY: BELONGS TO THE CLASS-A BET
IN ONLY ONE POSITION FROM SHV-2.
                                                                                                                                                                                Hydrolase;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        -
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      -
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             FUNCTION: Broad spectrum beta-lactamase which hydrolyzes penicillins, as well as cephalosporins except cephamycins. Also hydrolyzes aztreonam, but not imipenem. Confers highly resistance to ceftazidime, cefotaxime, aztreonam and piperacillin. CATALYTIC ACTIVITY: A beta-lactam + H(2)O = a substituted beta-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ENZYME REGULATION: Inhibited 16-fold better by the inhibitor clavulanic acid than by tazobactam. SIMILARITY: Belongs to the class-A beta-lactamase
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          amino acid

beta-lactamase (EC 3.5.2.6) - phage phi-X:
C;Species: phage phi-X174
C;Date: 13-Jan-1995 #sequence_revision 13:
C;Accession: S47061
R;Henrich, B.; Schmidtberger, B.
submitted to the EMBL Data Library, July :
A;Description: A variant of phiX174 gene I
A;Reference number: S47060
A;Accession: S47061
A;Status: preliminary
A;Molecule type: DNA
A;Residues: 1-286 <HEN>
A;Cross-references: EMBL: Z35638; NID: 95208
C;Superfamily: beta-lactamase I
C;Keywords: hydrolase
